Hi Ian,

Sorry for the delay in the response, this days were very busy. I did the plot for our experiment today, and it's attached in this email, feel free to send me any suggestions about it.

About the relation with the conductivity I still have to think more about it, I will start to search more about the subject and contact you as soon as I have more understanding.

Best regards,

Kevin Mota

Hello Kevin

~40 minutes in the car park in the beautiful sun, thanks very much. Please think of the model/plot and academically the intensity/spectrum to conductivity relations

Thanks very much for your time
And for wearing a mask.

Ian

Yes, I can help him, but I need to come back to Meyrin before 4 pm as I need to help Felipe with his travel.

I am with the DOC phone +41754115508.

Best Regards,

Kevin Mota.

Heloo Kevin,

Ian needs some help in 904. He confirmed that it's possible to travel with valid documents and the signed paper shared by Anton. I am leaving for Lyon to pick my wife. Can you be available at some point for help there for half s asbestos hour? You may share your phone to discuss the details .

I'll be available tomorrow for any help.

Mehar
