Dears,

I need an urgent clarification in order to publish these instructions/procedures regarding the iRPC water cooling system operation:

<https://codimd.web.cern.ch/onrXtEpCRsmpDIsW2rf22Q>

It seems that there is Figure 12 missing and due to this, it is not quite clear the instructions for disconnecting chambers in step 2 that in fact should be step 4 as I see steps 1,2,3 and then 2 again.

Thank you for you clarifications,  
Anton
