# Top 15 PCB Manufacturers in China: A Detailed Comparison [2026]

Posted by  Ross Feng

English

The PCB industry will continue to hold a sizable portion of the market in 2026 thanks to developments in consumer electronics, automotive, and telecommunications. Strict quality standards and dependable production are necessary for selecting the best partner. These businesses, which are among the **most reliable PCB fabrication manufacturers China**, provide scalable solutions for a range of applications and ensure accuracy in multilayer and high-density designs. Businesses can access a variety of material sources, timely technological advancements, and increased cost efficiency by partnering with an experienced PCB board manufacturer China.

urgent delivery requirements. Reputable circuit board suppliers offer a flexible supply chain that supports both large-scale production and small-batch prototypes.

This summary of the **top PCB manufacturers in China**, known for their creativity, customer service, and affordable prices, provides insightful information for businesses looking to streamline their design-to-production workflow in the quickly changing electronics sector.

## Here is the list of Top 15 PCB Manufacturers in China

### 1. Zhen Ding Tech. Group

Zhen Ding Tech. Group (founded in 1999 and headquartered in Taiwan) is one of the **leading china PCB manufacturers**. It has multiple production bases in China and Asia, and currently employs over 40,000 people, serving customers worldwide. As a famous PCB manufacturer China, Zhen Ding specialises in rigid PCBs, flexible PCBs, HDI boards, IC substrates, and rigid-flex solutions. They focus on the research, design and quality control of circuit boards, providing comprehensive services in areas such as smartphones, automotive electronics, consumer devices and industrial equipment. Zhen Ding, as the most trusted PCB fabrication manufacturer China, offers complete PCB solutions worldwide.

English

**Main  
Products**

FPC, Substrate-like PCB (SLP), HDI PCB, IC Substrate, Rigid Flex

**Applications**

Mobile Phone, Computer, Wearable, AR/VR, Smart Home, Base Station, Networking

**Factory  
Locations**

1. Shenzhen, Guangdong, China (products: high-end IC substrate, semiconductor packaging)
2. Huai'an, Jiangsu, China (products: rigid PCB)
3. Qinhuangdao, Hebei, China (products: FPC, HDI PCB)
4. Taoyuan, Taiwan (products: high-speed computing PCB, high-frequency microwave PCB, high-power PCB)
5. Kaohsiung, Taiwan (products: FPC)

**Innovation**

New products, new processes, new technologies, new materials, and new equipment

## 2. Suzhou Dongshan Precision Manufacturing Co., Ltd.

English

Suzhou Dongshan Precision Manufacturing Co., Ltd. (DSBJ) is one of the global high-tech enterprises, specialising in electronic circuits, precision sheet metal, and display products. As a **trusted PCB manufacturer in China**, the company provides advanced rigid, flex, rigid-flex, and HDI solutions to global customers. DSBJ has many years of expertise in PCB manufacturing in China, widely serving industries such as telecommunications, automotive, consumer electronics, and industrial equipment. Renowned for its persistent innovation and high quality, DSBJ has become a resident PCB board manufacturer in China. It provides high-quality PCB products and services globally, while participating in the trend of sustainable development, promoting technological progress, and establishing long-term partnerships with international customers.

Website	<a href="https://www.dsbj.com/#en">https://www.dsbj.com/#en</a>
Year Founded	1980
Main Products	Flexible PCB, Rigid Flex PCB, Rigid PCB, LED Packaging, Touchscreen module, Telecommunication Parts, EV Parts, PCB assembly
Markets	EVs, Telecommunications, Consumer Electronics
Factory	1. MFLEX – Yancheng, Jiangsu, China

English

4. LED Products – Yancheng, Jiangsu, China

5. Precision Products – Suzhou, Jiangsu, China

---

**Advantages**    Very famous for flexible PCB and rigid-flex PCB production

---

### 3. Viasion Technology Co., Ltd

**Viasion Technology Co., Ltd** (established in 2007 and headquartered in Shenzhen, China) is an outstanding **PCB manufacturer in China**, specialising in low to medium-volume PCB fabrication and assembly services. With over 16 years of PCB processing experience, Viasion is able to provide customers with a comprehensive product range, including the production of rigid, flexible, rigid-flexible, HDI, and high-frequency PCBs. Viasion provides high-quality and cost-effective solutions to over 1000 customers worldwide. The company is committed to providing reliable and accurate PCB manufacturing services, ensuring customer satisfaction, and promoting long-term partnerships.

English

**Year  
Founded** 2007

**Main  
Products**

Rigid PCB, Flexible Printed Circuits (FPC), Rigid-Flex PCB, High-Density Interconnect (HDI PCB), High Speed, High Frequency, Metal core, Ceramic, PTFE, Alumina, Backplane, Embedded Devices, IC Substrate, Impedance Control, Back drill, Heavy Copper 40 oz

**Markets**

Industrial, Energy and Power, Automation and Control, High-speed Communications, Robotics, IOTs, Medical and Healthcare, Automotive, Aerospace, Consumer Electronics...

**Factory  
Locations**

1. Shenzhen, Guangdong, China  
2. Yiyang, Hunan, China

**Advantages**

High-mix low-volume (HMLV) manufacturing, One-stop PCB fabrication and assembly services, competitive pricing

## 4. Tripod Technology Corporation

English

and telecommunications. Tripod is now among the most reputable PCB manufacturers in China thanks to its many years of experience. It is well known for its cutting-edge production facilities and creative design aesthetic. The company has solidified its position as the best PCB manufacturer in China thanks to its unwavering commitment to product quality and belief in sustainable development.

Website	https://www.tripod-tech.com/
Year Founded	1986
Main Products	Any Layer, Double-sided PCB, HDI (with VIPPO), Heavy Copper, Multi-layer PCB, High Layer Count, Semi Flex
Markets	TFT-LCD, Hard Disk Drive, Server, Automotive, Notebook Computer, Handset
Factory Locations	1. Taoyuan, Taiwan 2. Wuxi, Jiangsu, China 3. Xiantao, Hubei, China 4. Bien Hoa, Dong Nai, Vietnam
Advantages	Quality products, on-time delivery and reasonable pricing

English

# SCC 深南电路

Shennan Circuits Company Limited is a well-known manufacturer of printed circuit boards with a focus on flexible and high-precision multilayer boards for the automotive, communication, and electronics industries. It is regarded as one of the leading PCB manufacturers in China and is distinguished by its superior quality, inventiveness, and prompt delivery. Shennan Circuits, a major participant in China PCB manufacturing, offers dependable and effective PCB solutions for clients worldwide looking for performance and durability by fusing cutting-edge technology with stringent quality control.

Website	<a href="https://www.scc.com.cn">https://www.scc.com.cn</a>
Year Founded	1984
Main Products	Mechanical Blind holes Backplane, 100 layers double-sided Crimping Backplane, Multifunctional integrated Copper Combined board, ODU RF Board, BMS FPC Board, SSD FPC Board
Markets	Wireline & Wireless Network, RF and Microwave, Thermal Management
Factory Locations	1. Shenzhen, Guangdong, China 2. Wuxi, Jiangsu, China

English

Advantages

Provide one-stop service for printed circuit boards, electronic assembly, and packaging substrates

6. Compeq Manufacturing Co., Ltd.

Compeq Manufacturing Co., Ltd. was founded in 1975 and is headquartered in Taiwan. It is a leading supplier of high-precision printed circuit boards with large-scale and modern production facilities in Asia. As a globally **renowned Chinese PCB manufacturer**, Compeq provides flexible, rigid, and HDI PCBs for top smartphone, automotive, and wearable brands. With decades of experience, advanced equipment, high yield rates, and strict quality control, their advantages undoubtedly make them one of the famous PCB manufacturers in China. Customers consider Compeq as the best PCB manufacturer in China due to its innovation, reliability, and fast turnover, making it the preferred partner for cutting-edge electronic OEMs.

Website      <https://www.compeq.com.tw>

Year  
Founded      1973

Main  
Products      Multi-layer PCB, H.D.I. (High Density Interconnection), H.L.C. (High Layer Count), F.P.C. (Flexible PCB) and Rigid-Flex PCB

English

**Factory  
Locations**

1. Taoyuan, Taiwan
2. Huizhou, Guangdong, China
3. Suzhou, Jiangsu, China
4. Chongqing, China

**Advantages** Supply flex PCB and small quantity part assembly services

## 7. Unimicron Technology Corporation

**Unimicron**  
欣興電子

Unimicron Technology Corporation (established in 1990 and headquartered in Taoyuan, Taiwan) is a leading china PCB manufacturer. The circuit board that they specialise in is high-density interconnect (HDI) boards, flexible PCBs, rigid-flex PCBs, and IC substrates. With strong production support from its manufacturing plant in Taiwan and its PCB fabrication manufacturers China, Unimicron can continue to be active in the global market and provide advanced solutions for consumer electronics, automotive, telecommunications and other industries. As a **prominent PCB**

English

Website	https://www.unimicron.com
Year Founded	1990
Main Products	Printed Circuit Boards (PCB), High-Density Interconnect Printed Circuit Boards (HDI PCB), Flexible Printed Circuits (FPC), Rigid-Flex PCB
Markets	Consumer Electronics, Healthcare, and High-speed Communications
Factory Locations	1. Taoyuan, Taiwan 2. Shenzhen, Guangdong, China 3. Suzhou, Jiangsu, China
Advantages	Advanced packaging technology and cultivate high-end product technology platforms

## 8. Kingboard Holdings Limited

English

as a **trustworthy PCB manufacturer Shenzhen**, it provides creative solutions under stringent quality control. Kingboard is a reputable option for customers looking for long-lasting and effective PCB solutions globally because of its high production technology, solid international relationships, and reliable performance among China PCB manufacturers.

Website	https://www.kingboard.com
Year Founded	1988
Main Products	Paper Based Copper Clad Laminates, Glass Based Copper Clad Laminates (FR-4) , High Density Interconnect (HDI) PCBs
Markets	Consumer Electronics, Healthcare, and High-speed CommunicationsComputers, Communication Devices, Consumer Electronics and Precision Instruments in the Automotive and General Industry Sectors
Factory Locations	1. Guangzhou, Guangdong, China (products: double-sided, multi-layer) 2. Suzhou, Jiangsu, China (products: single-sided, double-sided) 3. Shenzhen, Guangdong, China (products: glass epoxy laminate) 4. Shaoguan, Guangdong, China (products: paper laminate)
Advantages	Gain UL Certificate, ISO/IATF Certificate, VED Certificate, JET Certificate, CQC Certificate, MSDS, RoHS test Report

English

9. AT & S Austria Technologie & Systemtechnik  
Aktiengesellschaft

Leading PCB manufacturer AT&S Austria Technologie & Systemtechnik Aktiengesellschaft specialises in high-density and sophisticated multilayer boards for industrial, automotive, and electronic applications. Recognised as a reliable PCB China manufacturer, it delivers precision and innovation across global markets. As a reputable PCB prototype manufacturer China, AT&S offers customers high-performance, long-lasting, and efficient PCB solutions that are customised to meet intricate design specifications by fusing state-of-the-art technology with strict quality control.

Website	https://ats.net
Year Founded	1987
Main Products	IC Substrates, Flexible and Rigid-Flex PCBs, Cavity PCBs, HDI PCBs, High-frequency PCBs
Markets	Automotive, Aviation, Industrial, Medical, Communication, High end Computer & Server Applications

**Factory Locations**

2. Chongqing, China (products: IC substrates and modules)
3. Shanghai, China (HDI and mSAP printed circuit boards)
4. Nanjangud, India (products: HFI and HDI printed circuit boards)
5. Kulim, Malaysia (products: high-end IC substrates)

**Advantages**

Master 2.5D Technology, mSAP Technology, Z-Interconnect Technology, Embedded Component Packaging (ECP) Technology

## 10. Kinwong Electronic Co., Ltd

A top supplier of premium PCBs, Kinwong Electronic Co., Ltd. offers multilayer, flexible, and high-density boards for use in industrial, automotive, and electronic applications. Listed on the China PCB manufacturer list, it is renowned for its inventiveness and dependability. A reputable partner for customers looking for long-lasting and effective PCB solutions globally, Kinwong Electronic stands out among China PCB manufacturers due to its superior production technology, stringent quality control, and prompt delivery.

**Website**

<https://www.kinwong.com/en/>

English

Main Products	Metal Base PCBs, HDI PCBs, RF PCBs, Substrate-like PCB, Flexible PCBs, Rigid-Flex PCBs, High Layer Count PCBs
Markets	Automotive, Smart Terminal, Consumer, Power Supply, Telecom, Industrial & Medical, Computing
Factory Location	1. Shenzhen, Guangdong, China 2. Heyuan, Guangdong, China 3. Zhuhai, Guangdong, China 4. Jian, Jiangxi, China
Advantages	Be famous for quality assurance and zero defects quality strategy

# 13. Victory Giant Technology (Huizhou) Co., Ltd

Serving the electronics, automotive, and telecommunications sectors, HanStar Board Corporation is a top manufacturer of premium multilayer and flexible PCBs. Known for accuracy, creativity, and dependability, it is regarded as one of the leading PCB manufacturers in China. HanStar Board, a major participant in China PCB manufacturing, combines cutting-edge technology with stringent quality control to provide long-lasting and high-performance PCB solutions that effectively and reliably satisfy the various demands of international clients.

Factory Location	1. Huizhou, Guangdong, China

## 14. Flexium Interconnect, Inc.

A top supplier of premium flexible and rigid-flex PCBs, Flexium Interconnect, Inc., caters to the industrial, automotive, and electronics sectors. Acknowledged as a reliable PCB prototype manufacturer China, it provides accurate and creative solutions. Flexium Interconnect stands out among the best China PCB manufacturer choices due to its cutting-edge technology, stringent quality control, and dependable production. It provides robust and high-performance PCB solutions that satisfy the various demands of customers around the globe.

Website	<a href="https://www.flexium.com.tw/?lang=en-us">https://www.flexium.com.tw/?lang=en-us</a>

Markets	Wearable, Automotive, Medical, Display, Consumer, Antennas
Factory Location	1. Kaohsiung, Taiwan 2. Kunshan, Jiangsu, China

# 15. Shenzhen FastPrint Circuit Tech Co., Ltd

High-quality multilayer and flexible PCBs for industrial, automotive, and electronic applications are the speciality of Shenzhen FastPrint Circuit Tech Co., Ltd. Acknowledged as a dependable PCB manufacturer China Shenzhen, it is commended for accuracy, creativity, and prompt delivery. Among the **PCB manufacturer China**, FastPrint is notable for its cutting-edge technology, stringent quality assurance, and reliable performance, offering robust and effective PCB solutions that satisfy the various demands of customers across the globe.

## Author: Ross Feng

Ross has more than 20 years of experience in the PCB industry. He started his PCB career in a sales role in 2004 working for Yantat PCB Co., Ltd which is one of the best PCB factories in China. In his time there he gained extensive knowledge of PCB fabrication, engineering, quality and customer service. In 2007, he founded Viasion with a small group of professionals, specializing in small to medium PCB supplying. As CEO he successfully led Viasion through the strategic consolidations of 2 factories in the PCB fabrication and assembly sector and achieved continuously and sustained growth since its foundation.
