hi Ian,

in attachment you can find the results from the IRMS analysis searching for remaining solvent vapours in the flexible pipes. You can see the chemical properties and the chemical formula of the solvent.

The contact person is Marc Thiebert (TE-VSC-SCC), 165909, bldg. 107/R-B05

Regards, Anton

Hello Anton

Sorry to bother you in this tough time but do you have details of the Cu pipe you had cleaned for P5 installation, the source and the method to clean. Maxime needs <50m.

Thanks Ian
